
Mike\'s Extra 260 Composite-ARF

Posted by RickB - 2007/10/18 23:26

This is Mike Smith's. I was lucky enough to meet Mike and his partner Ken Giordano this Saturday morning when I came out to the AMPS flying field for a refresher lesson with my instructor. I have to tell you, this plane is a work of art as much as it is a workable flying aircraft. From the electronics to it's magnificent paint, what a great plane and a perfect addition to AZMAF's first in our "Feature Plane" series.

All I can say is "Great Job" indeed Mike!

The plane is an Extra 260 Composite ARF

Wing Span: 118"

Fly Weight: 38 pounds.

Length: 110"

Engine: DA150 16.5 Hp

Prop: Mejzlik 30x12

Pipes: MTW110 (cans)

Radio: Futaba 12Z

Receivers: 2-9DP PCM

Servos: 12-Hitec Digital Coreless HS-5955TG's

Power Expanders: 2-Smart-fly Sport expanders

Internal Power: 3-Fromco batteries, 7.2 Volt with 3 regulators

So is this a "park flyer?" haha That plane is so beautiful. Composite-Arf is one of the best airplane companies out there! If you get board look at Krill model airplanes also. They are very sharp, and all composite.
